RELIABLE POLYPROPYLENE PRODUCTS, CRAFTED  
FOR EXCELLENCE**

# **Arun Bhandary Global Traders**

Your Trusted Source for Versatile and Reliable Polypropylene  
Products, Crafted for Excellence.

# ABOUT US:

Arun Bhandary Global Traders is a renowned name in the field of agriculture and food product exports, proudly based in India. With years of expertise and a steadfast commitment to quality, we have built a reputation for delivering premium agricultural products to markets around the globe. Our dedication to excellence and customer satisfaction has enabled us to establish strong, long-lasting relationships with our clients.

In our ongoing pursuit of diversification and growth, we are excited to announce our expansion into the polypropylene product market. This new venture allows us to broaden our product range and cater to the evolving needs of our customers. As we embark on this new journey, we remain committed to upholding the high standards that have always defined our brand.

*Premium Polypropylene Products Designed for Performance*

# MISSION:

Our mission at Arun Bhandary Global Traders is to provide top-quality products that meet the highest standards of excellence. We strive to build lasting partnerships with our clients by consistently delivering superior value and exceptional service. Our foray into the polypropylene market reflects our commitment to innovation, sustainability, and the continuous improvement of our product offerings. We aim to contribute positively to the global supply chain by ensuring that our products are both environmentally friendly and economically viable.

*Your Trusted Source for Versatile and Reliable Polypropylene Products.*

# FIBC BAGE

A bulk / Jumbo bag or flexible intermediate bulk container (FIBC) is defined as an intermediate bulk container, having a body made of flexible fabric and are designed to pack & lift bulk materials ranging from 500kg to 2500kg.

## Features:

- Very strong and flexible
- Each FIBC can carry upto 2000KG weight.
- Each FIBC has integral lifting loops, eliminating the need for pallets.
- Excellent Printability
- Efficient use of space with Specific Designs

# BLOCK BOTTOM BAGS

Block Bottom Bags are also known as AD\*STAR Bags which are ideal for automated filling have distinctive design of sturdy bottom which make this bag great stability and can stand-up securely. It is used for packing materials like cement, flour etc.

## Features:

- 100% customized PP Sack with any customized size, colour, GSM
- UV Protection from 200 to 1600 Hours
- Valve for easy filling
- Recyclable
- High strength & Increased tear resistance

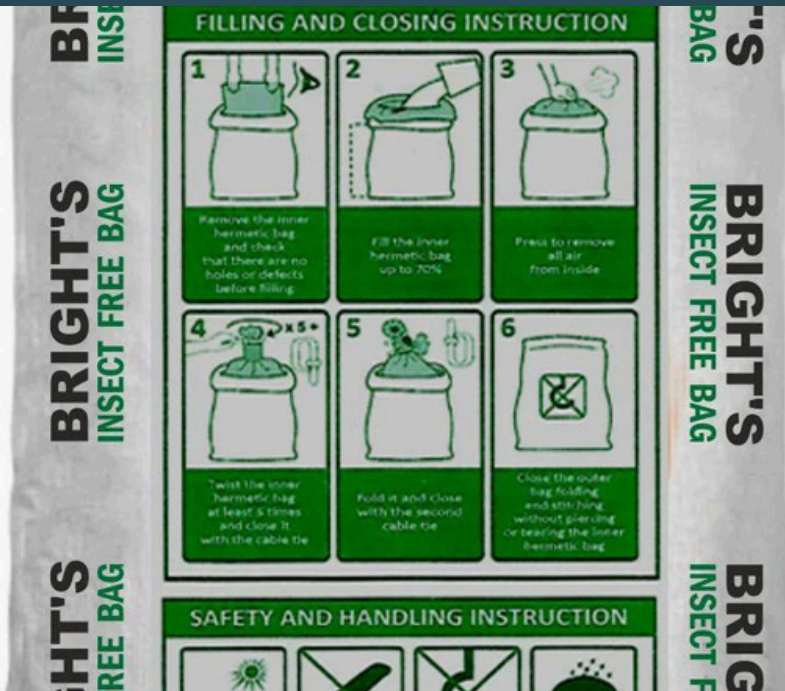

# BRIGHT'S INSECT FREE BAG

As name indicates Insect free bags prevent the Insects manifestation to the food grains/ Seeds stored into the bags. The additives used in the making of the bag is approved and recommend by UNFAO/WHO & EU.

## Features:

- Bright's Insect free Storage Bag is a Polypropylene woven Insecticide incorporated storage Bag.
- Insecticide – Deltamethrin
- FAO / WHO approved insecticide for use in Ag., PH, Veterinary, Industrial applications

# MULTIFILAMENT YARN

Multifilament yarns are composed of bundled individual filaments. The unit for expressing the size of the filaments or the yarn itself is denier or tex. Denier is the weight in grams of 9,000 meters of filament or yarn, while tex is the weight in grams of 1,000 meters.

## Features:

- High tenacity up to 8 g/d
- Wide range of denier from 200 to 6000.
- Available in FDY Flat, FDY Intermingle & FDY twisted
- UV protected
- Can replace Nylon or Polyester

# PP WOVEN BAG

Woven PP bags are laminated with a polypropylene coating, inside or outside, giving an added barrier to moisture and product leakage, without hindering Easy-Open and Re-Closure options. They are also UV stabilised for a longer lifespan when exposed to sunlight.

## Features:

- Fabric weight from 65 gsm to 200 gsm
- Extrusion coated and uncoated versions
- 10 x 10, 10 x 8, 12 x 12 and 14 x 14 weave construction
- Multi-color printing
- Ultraviolet (UV) protection

# LENO BAGS

We pride ourselves on being a one-stop conversion company, offering 100% in-house Leno conversion, printing, sewing, and final manufacturing. We have the most stringent specifications for our products including material weight, quality of dye pigments, resins and bag strength

## Features:

- Safe & hygienic packaging for horticultural products, consumables and perishables
- Light weight & durable
- Does not impart odor to packed fruits & vegetables

# PP / HDPE FABRICS

high quality fabric is woven on an array of wide width looms. Fine and consistent even fabric is manufactured on world class circular looms. Bright recognises the need of its clients and is flexible as per customer requirement.

## Features:

- Softness
- Longer life span
- Eco-friendliness
- High tear resistance

# GEO TEXTILES

Woven geotextiles are made with synthetic polymers that are woven together, the way that most fabrics are. These take longer to make, but also have a high tensile strength and load capacity. Basically, woven geotextiles are best when you need something very sturdy and durable.

## Features:

- They are lighter in weight, this makes for easier handling and laying on site.
- Transport and labour costs are less in real terms.
- Knitted geotextiles have a high tear strength.
